

DESIGNED TO AMAZE.

EURO STYLE PRIVACY PARTITIONS

Commercial Washrooms. Brought to Life.

A WATTS Brand

Euro Style Partitions. Beauty & Privacy.

Bradley is proud to bring you our stunning collection of Euro Style Privacy Partitions.

With a selection of five different models, Euro Style Partitions provide high design features, advanced new materials and sturdy construction — perfectly complementing today’s commercial washrooms. Constructed with a clean, modern aesthetic, these partitions create a spectacular backdrop for your restroom designs. Choose from our original collection of high-end privacy partitions, Loft, Float and Lucent, or our new floor-to-ceiling privacy partition lines, Highrise and Skyline, to create distinctly welcoming and highly private spaces.

Many color options available for each model

Occupancy indicators for each model

Urinal & sight screens available in each style

Partition stall accessory options include: Grab Bars, Hooks, and Door Bumpers

Part of the Comprehensive Commercial Washroom package from Bradley

Durable and easy to maintain materials

Skyline & Highrise Series

Floor-to-Ceiling Privacy

In many of today's public restrooms, privacy is an important element for creating a comfortable, safe environment for all users. By eliminating the gaps between the doors and pilasters, as well as the open spaces between the floor and ceiling, partition design can de-stress the public restroom experience and create a peaceful refuge. Bradley's new floor-to-ceiling Euro Style Partitions offer the best of the best in privacy and design. These models not only feature luxurious design, but Bradley's Euro Style floor-to-ceiling system is custom engineered to the precise dimensions of the application — down to the millimeter — and best of class hardware with mortise lock and slow close hinges. These partitions are designed to perform beautifully for the life of the building.

SKYLINE

The ultimate in luxury and privacy for elegant restroom designs.

Bradley's new Skyline Euro Style Floor-to-Ceiling Partitions are made from enameled tempered glass which brings both light and lightness to the restroom creating an open, airy and elegant atmosphere. Fully enclosed and precision engineered to the room's exact measurements, these privacy enclosures provide beauty and comfort.

Skyline sets new standards, both in glass toilet partitions and floor-to-ceiling construction. Its signature look features an impressive, floating glass front, enclosed all the way to the ceiling and without any visible profiles or hardware. Skyline is a symbol of modern expression and luxurious interior design. There is no compromise on privacy.

Minimalist stainless-steel hardware is mounted on the inside of the stall letting the beauty of the glass shine through, while the front conveys a smooth streamlined and high-end look. The Skyline series has a max height of 9'8" (3000 mm) and features mortise locks. Its quiet, soft-closing doors, combined with the floor-to-ceiling structure, minimizes background noise, creating a truly private oasis.

HIGHRISE

Floor-to-Ceiling Privacy for restroom designs that dazzle

New Highrise Euro Style floor-to-ceiling series creates a private and striking design. The ceiling high construction of the partition wall is not only a design element but also part of the room design. Doors, sides and dividing walls reach from the floor to the ceiling creating a private space for users. The Phenolic LT material is lighter weight for easy installation and is moisture resistant even in wet environments.

The Highrise Series offers an optional LED occupancy indicator and has a max height of 9' (2743 mm). Highrise partitions are meticulously crafted to the room's precise measurements, in effect, each project is a custom design providing users a comfortable and quiet space. Mortise lock and slow close hinges provide an extra special touch for ease of use and durability.

Lucent, Loft & Float Series

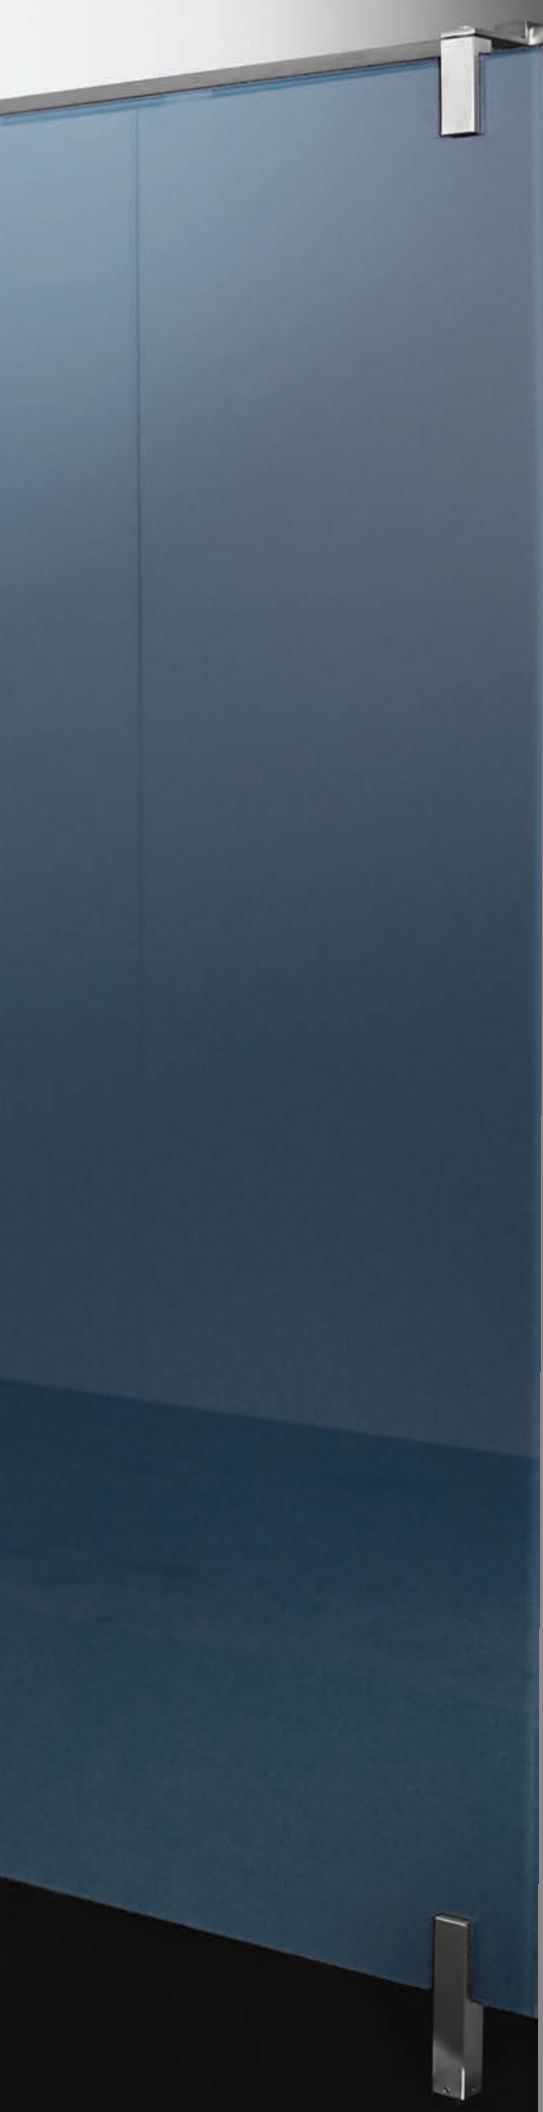

Floor Mounted Overhead Braced

Bradley's original line of Euro Style Partitions offer style and privacy in a sleek European design. These models feature high-end design with privacy in mind. Flush construction creates a smooth look with no gaps between doors. Minimalist stainless-steel hardware provides trouble free operation. Thoughtful elements like slow close hinges, LED occupancy indicators and recessed mounting hardware provide the best design choices for any commercial restroom.

LUCENT

Elegant privacy partitions that transform restroom spaces

For the best restroom designs, Lucent Euro Style Privacy partitions create an enchanting space of light and air. Enameled tempered glass brings both light and brightness to the restroom.

Flawless, refined and elegant, the Lucent Series provides an unparalleled choice for high-end commercial washrooms. Reliable, quiet, self-closing hydraulic hinges provide worry-free operation. Flush surface construction guarantees no gap privacy while highlighting the beauty of European design.

FLOAT

Sophisticated design creates a lighter than air experience.

Float Series partitions have a modern minimalist design with a twist. With the feet and headrail hidden from sight, it creates the impression that these partitions are actually floating on air, while still securely anchored to the floor and walls. The Float series partitions are robust, durable and beautiful, with a frameless construction and no visible hardware.

Quiet, soft-close hinges are also instrumental in creating this out of the world design. Float series partitions are constructed of Bradley's exclusive lightweight, Phenolic LT material and stainless steel hardware with a maintenance-free, easier to install design. Recessed feet make floor cleaning a breeze.

The soaring appearance, flush finish construction, and high-quality material make the Float Series an elegant yet resilient solution.

LOFT

Euro styling for highest demands.

The Loft Series partitions set the standard for Euro Style Partitions. Outstanding design, seamless construction with no visible gaps, and unmatched strength make these partitions ideal for any commercial restroom. Frameless construction with no visible hardware creates a streamlined, fresh look.

Made of Bradley's exclusive Phenolic LT lightweight material and aluminum framing, Loft partitions are lighter than comparable partitions, yet equally durable.

Loft partitions are designed to be easy to install, clean and maintain. Their dependable slow-close no-pinch hinges stand out as a thoughtful safety element, especially for young users.

Constructed to show a completely smooth clean front view, Loft partitions give a sleek new level of sophistication to any restroom design.

Euro Partitions Materials

Enameled Tempered Glass | Skyline & Lucent Series

Glass partitions provide a stunning addition to commercial washroom design with a wide variety of color options. Strong and safe, these glass panels resist chlorine and solvents and are UV resistant so the color doesn't fade. Scratch resistant, easy to clean and 100% recyclable. Available in a range of standard and custom colors.

Phenolic LT | Highrise, Float and Loft Partition Material

Bradley's exclusive new Phenolic LT material is manufactured with 1/8" phenolic face sheets supported around the perimeter with aluminum framing, creating lighter-weight, easy-to-install, durable panels that are impact and scratch-resistant. With an anti-bacterial coating and non-porous surface, Phenolic LT can help reduce the spread of germs and withstand wet and humid environments. Available in range of standard and custom colors.

Highrise & Float Series LED Occupancy Indicators

Not only an eye catcher but also a true innovation; an elegant LED light band is built into the cubicle system. When the cubicle door locks, the light band turns from green to red. Every user can easily see which cubicles are available and which are occupied. Besides providing a simplified visual guide, the innovative LED indicator is a real highlight in design. The power is supplied by a 12-volt direct current with the supply line hidden from view within the mounting structure.

Lucent Exclusive Door and Hinge Operation

Using precision engineered construction, the door is fixed into the headrail through a hydraulic self-closing hinge system. The top hinge attaches directly to the headrail, the bottom hinge attaches directly into the floor with European designed hardware, maintaining the sleek clean look of the partition door. The door operates smoothly and reliably time after time for worry-free beauty.
